

## Install Arduino IDE using Chrome OS:

Follow the instructions below to install Arduino IDE on your Chromebook

### Setup:

- Click on the clock at the bottom right corner of your screen
- Click on the **gear** at the top right of the pane that opens
- On the left side of the settings menu, click on **Linux (Beta)**
- Click **Turn on**
- Click **Next** and then **Install**
- Wait for Linux to install, the terminal will open

### Installing Arduino IDE:

- Go to <https://www.arduino.cc/en/software> and click on **Linux 64 bits** to download the Arduino tar.xz file
- Save to your **Linux files** folder
- In the terminal type to the following commands
  - o `tar -xf arduino-1.8.13-linux64.tar.xz`
  - o `sudo mv arduino-1.8.13 /usr/share`
  - o `cd /usr/share/arduino-1.8.13/`
  - o `sudo ./install.sh`

**You can now open Arduino IDE from the launcher menu**
